

Women's Health Requirements Discovery Pack

Decisions And Owners

Please use this sheet to record the remaining decisions and who will own each one.

Prepared for requirement discussion.

Area	Decision needed	Options or examples	Final decision	Owner	Target date	Notes
Clinical scope	Which service should pilot first?	Colposcopy first Gynaecology first Both together				
Clinical scope	Which categories must be included in pilot 1?	Highest-volume categories only High-risk categories only Broader first release				
Pilot	What does success look like for the pilot?	Turnaround improvement reduced clicks safer triage category coverage user acceptance				
Pilot	When does the client want to start the pilot?	As soon as possible after technical setup after redacted-case validation				
Pilot	How will the pilot be evaluated?	Redacted-case review retrospective parallel grading live controlled pilot				
Clinical validation	Who will confirm colposcopy workflow and rule interpretation?	Named colposcopy clinical owner				
Clinical validation	Who will confirm gynaecology summary content and rule interpretation?	Named gynaecology clinical owner				
Workflow	Should the first pilot include booking workflow or stop at triage outcome?	Triage only Triage plus booking handoff				
Workflow	What exact return-to-GP and request-more-information outcomes are required?	Service wording to be confirmed				
Technical	What hosting environment is approved?	Health NZ managed approved NZ hosting existing internal platform				
Technical	What patient and referral data sources are available in phase 1?	Manual upload limited integration full source integration				
Technical	Is NCSR required for colposcopy pilot?	Yes No only for some scenarios later phase				

Area	Decision needed	Options or examples	Final decision	Owner	Target date	Notes
Other vendor	What is the boundary between this work and the other vendor's work?	Complementary overlapping different service pilot only				
AI	Is AI in pilot scope at all?	No AI summary only summary plus recommendation				
Governance	Can redacted cases be used for validation and pilot preparation?	Yes No approval required				
Governance	Who will own ongoing validation sessions and decisions?	One owner each for colposcopy, gynaecology, workflow, and technical
